Re: Business Intentions with Regard to SCSI 2 Connectors

This is intended to clarify the business intentions of Fujitsu Component of America with regard to manufacturing and marketing the FCN230 Series of connectors that complies with the requirements of the SCSI 2 document currently forwarded to the Plenary Committee.

Fujitsu Component of America intends to continue to manufacture and market the connectors that satisfy the Input/Output requirements of the SCSI 2 Standard in the United States. We are currently conducting negotiations with AMP regarding U.S. patent #4,808,125.

We trust that this alleviates concerns that some members of the committee had expressed.

Sincerely,

Joel R. Urban
Marketing Manager
