■ Nontechnical changes

Corrected Editorial Style to X3T9.2 requirements

128

X3T9.2/93-025 r0

Remaining Concerns

■ Possible Modifications of FC-PH

Creation of required leading fields for Entity Address, Transfer Ready, and Generic Status. Presently, all installed except Generic Status.

Will be installed when FC-PH is updated.

■ Definition of Reset

Requires additional details to indicate full Reset function.

■ Definition of queue management set boundaries

May require additional words for clarification.

Queue Almost Full not presently a required function.

■ Open Boot Compliance (P1275)

Definition of Open Boot parameters is required.

May require definition of FC-PH boot management interface.
